aswikasturi-debug.github.io

English (India)

Turn voice monitoring ON

Live transcript

Turn monitoring on and speak.

Saying **"help"** (or a serious phrase) starts a 3-second cancel window, then your **first-priority contact is dialled automatically**. Say "cancel" to stop. Typed tests never place real calls.

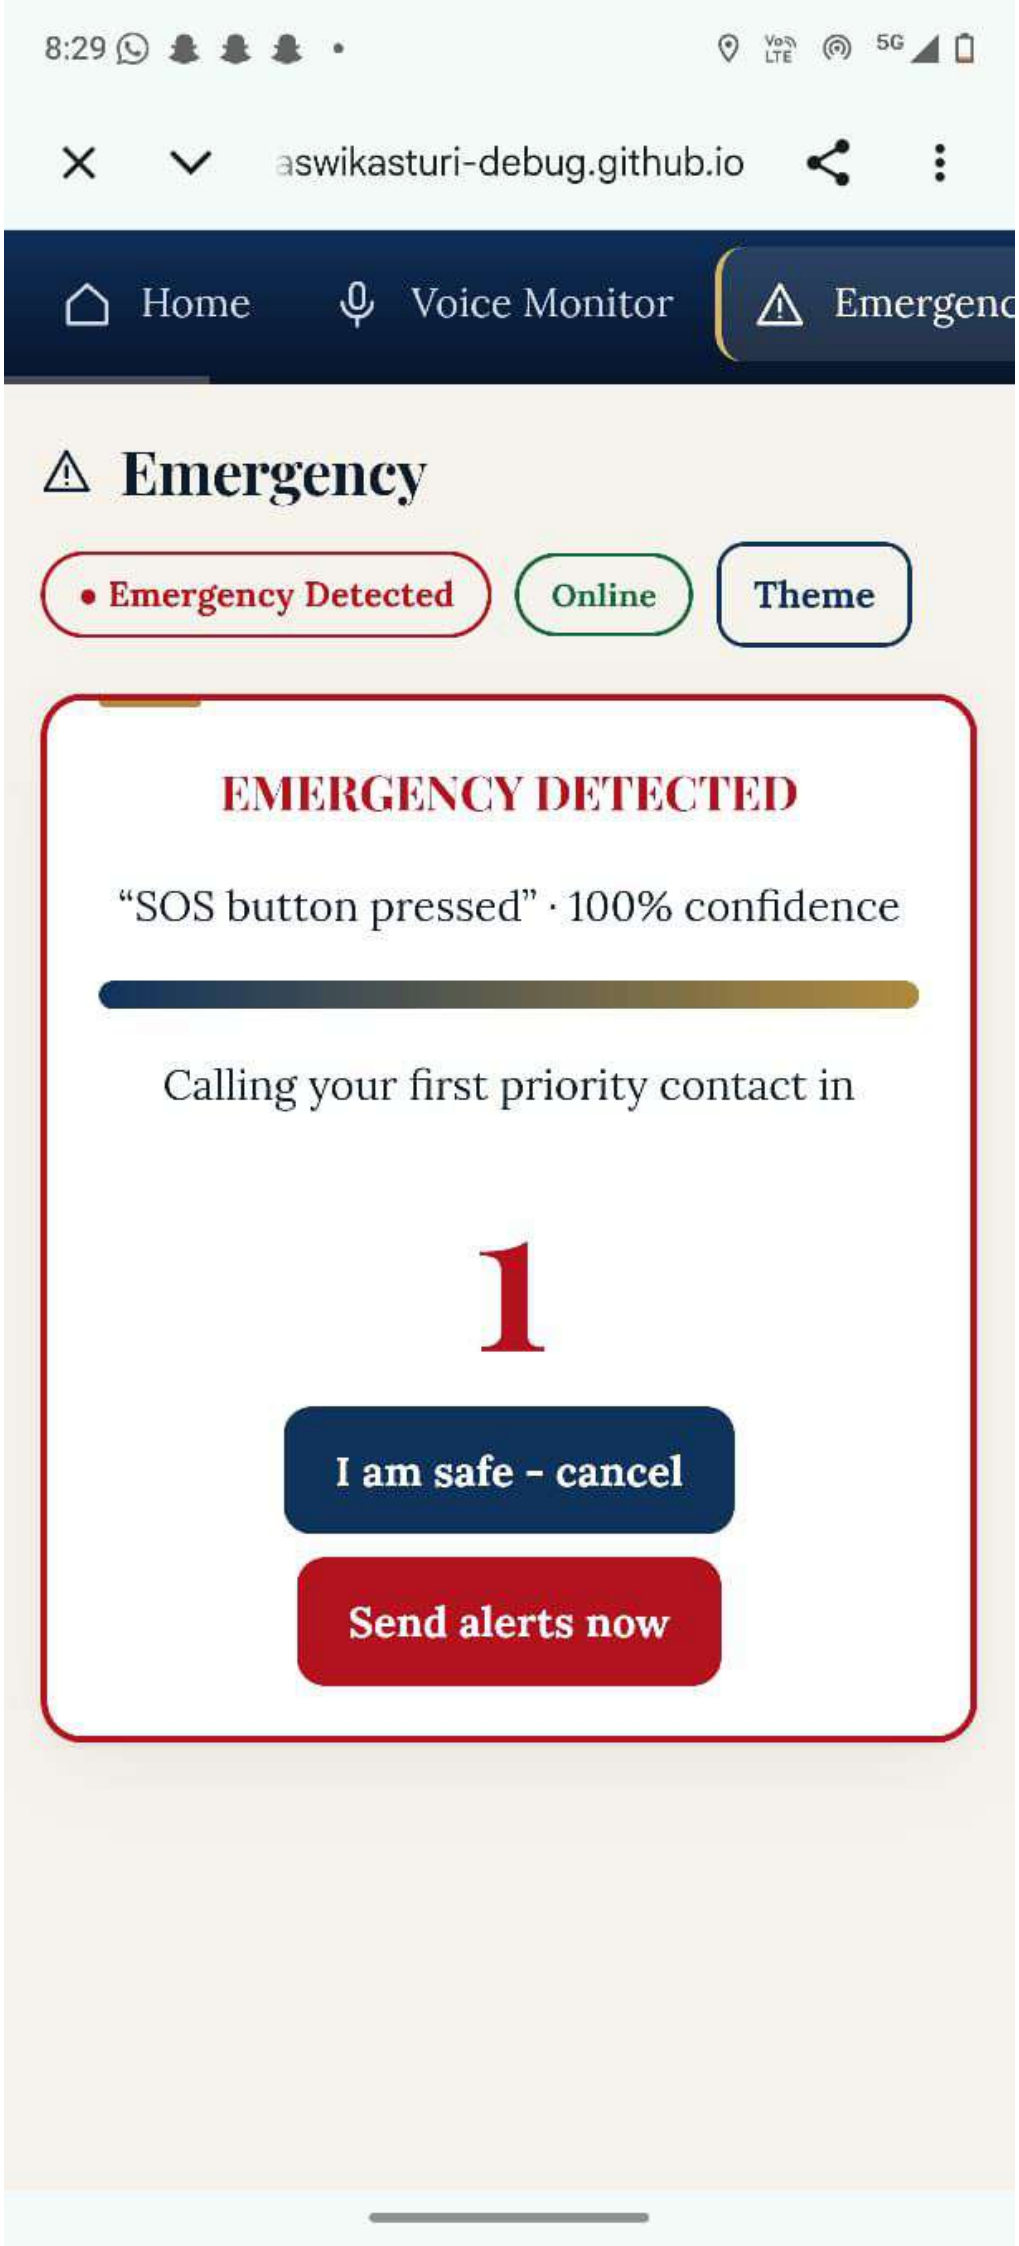

No microphone? Type a phrase to test detection

e.g. Help, I fell down

Analyse phrase

Detection results

Say something, or use the typed test.
